Lesson matches original description in provider application	S		Upon entering the website, students are instructed to complete either a math or language assessment to determine their individual strengths and challenges. After the assessment is completed, lessons related to students' challenge areas were available for selection. For example, after a math assessment, the following were challenge areas that were identified: 1) Circles, 2) Geometric figures, 3) Decimal # Concepts, & 4) Algebra Concepts. Students then sequentially begin working on concepts that they have not mastered by first reviewing study materials on the concept, next completing lessons to practice the concept and lastly completing tests designed to determine whether a student has mastered a concept.  Observed online lesson matches provider application.
